Update on Da Zi Bao Process

For those of you who have been waiting patiently, or not so patiently as the case may be, the staff of Da Zi Bao extends its apologies for the delays in getting the issues of Da Zi Bao out. The main reason is that we have had many more messages than we had expected, and have had to reorganize the whole operation. We are particularly behind in getting out translations of the message,s however, the revisions to the process should reduce the delays in that too. Special thanks are due to the whole Da Zi Bao team -- Nathalie Liamine, Tony Judge, Marita Reiner, Joelle Marelli, Catherine Lebrun and David Seeds, as well to as others who have been providing support for the Da Zi Bao process, especially those who have been contributing messages. #64

Pakistani Women and the Environment

52% of Pakistan's population consists of women. They should be involved in environmental projects at grass-roots level, as they have a direct contribution and impact on various factors influencing environmental conditions. Perhaps one day we shall succeed in mobilizing our women NGOs to combat the menace of environmental degradation. #65

Write off debts

To improve the financial resources of developing countries, West should write off the debt, subject to the condition that the amount required for debt servicing each year would be earmarked for environment projects. #66

Our destination

The term nongovernmental organization (NGO) conveys nothing of the vitality, struggle and richness of spirit our efforts for survival and reconstruction proceed from. In India we call ourselves 'Svechhaka Sancathana' or voluntary associations of people as citizens and social persons. I call for the recognition and honouring of our true vocation. #76

Human Shelter and Environment

Shelter, which is one of necessary elements for human, is in close relation with the environment. Shelter needs solid, suitable and artistic housing buildings, and what is more, it needs clear, quiet and beautiful environment. Let us hand by hand effort for protecting environment, improving shelter condition and maintaining the right of human existence. #80

A Holistic, Integrative View

The Baha'i approach to environmental preservation is holistic and integrative. It is based on a new vision for humanity and the natural environment that emphasizes unity of effort, spiritual values like sacrifice, social integration, selfless action and unity of purpose. "The earth is but one country and mankind its citizens." Baha'u'llah #81

Survival and Humility

"If the earth is to survive with all its existing living forms, man will have to become humbler and exist as just one of the many life forms, not the dominant one." #82

Let's Get Beyond Complaining

The role of NGOs should involve more than the right to complain or the right to point out limitations within the public sector. Instead, this role should be based on the right to participate effectively by demonstrating what works and that alternative solutions are effective, economically feasible and environmentally sustainable. #83

Environmental Economics

Scarcity is shifting from man - made capital to natural capital. Our economic thinking had to be adapted and economic instruments have to be developed. Discussion Thursday 19th from 4PM to 6PM in the meeting room Youth Hostel d'Artagnan, 80, rue Vitruve, Paris 20th. #85

Agriculture

Discussion on the resolution on (organic) agriculture, still missing in the agenda Ya Wananchi, Wednesday 18th, from 4PM to 6PM in the meeting room Youth Hostel d'Artagnan, 80, rue Vitruve, Paris 20th. #86

Our Culture and Environment

The cultural values of the people are in a crucial factor in the success or failure of every development program. Projects that did not account for local customs and traditional beliefs of the communities, have collapsed due to lack of popular mobilization. We must, therefore, re-discover our cultural roots, integrate progress with tradition and strengthen the roots for the future. #87

Sylvester Sentamu-Makumbi, Jeep, Uganda

Brundtland Buzzwords

The primary surviving buzzwords from the Brundtland commission, "sustainable development", have been manipulated and co-opted beyond belief as seen through corporate advertising and rubber boned political reelection campaigns speeches of the North. From Rio we need words that guarantee action ones that cannot be hidden behind. I suggested for discussion: Justice between people - Justice between species - Justice between generations #88

Annual Prisoners Day

Ansar Burney welfare trust Pakistan has succeeded in getting the release of more than 57000 illegally and unlawfully confined prisoners and sane inmates of the mental asylums from throughout the world, some of them were confined within the high walls illegally for about 60 to 65 years and some of them were born there and not released until 40 years and were released only because of the efforts of Ansar Burney Welfare Trust. We would like to suggest a "Prisoners Day" Every year from the UN side on any day on month of every year. #91

Ansar Burney, Ansar Burney Welfare Trust, PAKISTAN

A Point to Ponder On

Imagine everyday one million plastic bags being thrown over your town or village or country. In some days you will be walking, sleeping, dancing on plastics. Anybody to tell us what to do about this? #92

Vision from the South

Dutch policies on sustainable development criticized by four guests from the "South". Critical of Northern overconsumption and alienation from nature, the book is an important companion not only to the Netherlands National Report to the UNCED in 1992 but also to the National Reports from Northern countries. On sale at the EUROPE stand and from Ian van Arkel Publishers, A. Numkade, 17, 3572 KP, Utrecht, Netherlands. Price US \$10 or equivalent. Concession for the Eastern and Southern NGOs. #93

The Public's Rights to Know & Participate

Before UNCED, all governments must make clear, specific and timely commitment to introduce all necessary measures to give the public, especially locally affected people, the timely, unrestricted right to all information on all products, processes and whatever their origin. Government must guarantee peoples' participation to influence decisions. #94
