y2k countdown digital date clock

```
1999.10.24 - Sunday 24 October - 2 months 7 days to 2000.01.01
```

between now and 1999.12.31 - friday 31 december, 1999
use the **y2k countdown digital date clock**

- on all your correspondence

from now through the new millennium, use the **digital date clock**

- for all your documents and financial records

the digital date clock - a universal format for recording dates - uses the yyyy.mm.dd format - eg 1999.10.24 - sunday 24 october 1999 - united nations day.

- the digital date clock:

    - is fully year 2000 compliant
    - exhibits the properties of an ordinal number
        - promotes orderliness in managing dates
        - eliminates ambiguity and cultural variation in recording dates
        - uses characters compatible with prevailing standards for file names
    - promotes public awareness towards being prepared for possible y2k - millennium bug / crisis / bomb - breakdowns, environmental, financial and social threats, including possible disruption of basic services.

- the y2k countdown digital date clock is an initiative of
    - information ecology networks for a new millennium
